

Worldwide Highest Vertical Lift: Record-Breaking , Multi-Sensory Roller Coaster

Maurer builds an exclusive coaster for Universal Orlando Resort in Florida. Munich, Orlando FL. - The worldwide highest vertical lift, one of the highest loops and the most superb video, light and sound technology – a roller coaster of the superlative kind is due to open in Orlando FL. "Hollywood Rip, Ride, Rockit" combines the ideas of the Universal entertainment professionals with the technical know-how of the roller coaster manufacturer Maurer Rides Munich.

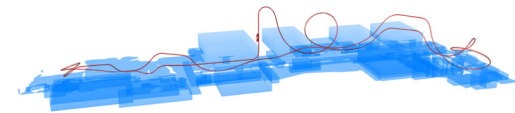

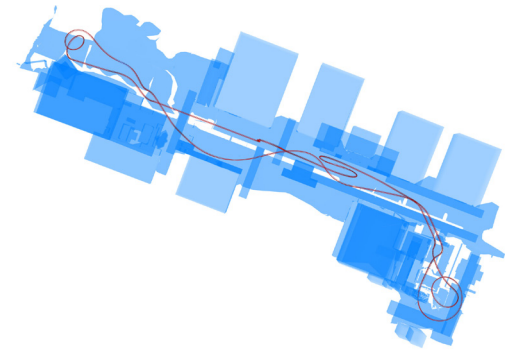

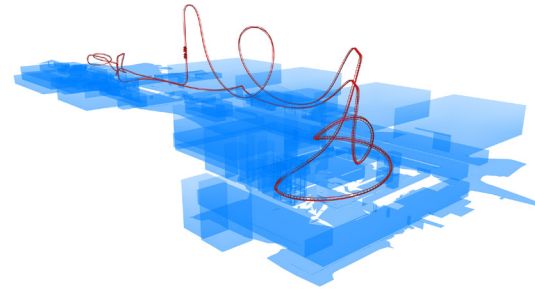

"Rockit" – the roller coaster short name defines the program: While boarding the guests can choose what kind of music will accompany them on their fast-paced ride over the tracks. In the process the roller coaster manages the fine balancing act between the superlative and the family ride. With 7 X-Car Tandems with 12 seats each Rockit has an extraordinary high capacity of 1850 pph.

Vertical Lift as an Eyecatcher

The roller coaster is already an eyecatcher from a distance – and that means something at Universal Orlando Resort, that is not exactly poor on attractions. The worldwide highest Vertical Lift emerges with a height of 50 m (165 feet) and is trimmed with the highest of security for worst cast scenario. The unique and extremely comfortable evacuating system is ground activated at the push of a button and allows the guests a cushy board-off on the ground.

Full of Electronics

"Hollywood Rip, Ride, Rockit" is the biggest X-Car Coaster built by Maurer Rides. The elongated layout with much airtime and suspenseful steep-curves hijacks the passengers with fantastic moments, surprises and just as many thrills. The sound system for the custom-made music is built-in at head level. Also included - the video camera that records an on-ride movie during the whole ride. The guests can take the movie home once the ride is over.
